Work Experience

BRSYS | Ust-Kamenogorsk, Frontend developer

May 2023 - May 2024

- Developed, maintained, and optimized the client-side of a medical equipment marketplace web application. ([link](#))
- Utilized modern technologies and frameworks, such as Next.js, React, and Redux-Toolkit
- Worked closely with backend developers, designers, and product managers to implement new features and enhance existing functionality.

Freelance | Online, Fullstack developer

April 2021 - Now

- Started my career on Weblancer ([link](#)) by creating landing pages, and while learning on the go, acquired full-stack development skills, delivering turnkey websites for clients.
 - Developed various types of websites, ranging from business card sites to complex interactive web applications.
-

Projects

140 | Educational platform for preparation for UNT

[Link to the project](#)

- A project that will help applicants thoroughly prepare for the UNT. I acted as a fullstack developer in the project and wrote everything from the first to the last line and customized the databases. I developed on React/Redux-toolkit / Golang/Gin/ Gorm / PostgreSQL

UIWave | A/B testing platform

[Link to the project](#)

- An A/B testing platform that allows you to change certain parts of your website for a specific percentage of users. Developed using React/Redux-Toolkit.

Qlixmed | medical equipment marketplace

[Link to the project](#)

- Medical equipment marketplace in Kazakhstan. Developed using Next.js/React/ Redux-Toolkit while working at BRSYS.kz.

You can check all my other projects on my website :)
